PROFESSIONAL SUMMARY

Full-stack AI engineer experienced in building production-grade LLM and RAG-based systems, spanning retrieval pipelines, agentic workflows, voice AI, and secure full-stack delivery, complemented by a background in project and product management and advanced Computer Science studies in Artificial Intelligence and data analytics. Skilled in leading teams, hardening systems for production, and applying data-driven strategies to deliver intelligent, scalable solutions.

WORK EXPERIENCE

Ten Pearls (Pvt.) Ltd.

Associate Software Consultant, Full-Stack AI Engineer | 10/2025 - Present

Delivered production LLM/RAG systems and full-stack AI applications across four client projects spanning healthcare, pharma, and enterprise IT support, covering retrieval pipeline design, security hardening, and cross-team delivery.

Inspira B2B AI, Astellas (Medical RAG Chatbot)

- Improved AI response quality and citation accuracy for a medical RAG chatbot supporting liver/kidney transplant guidance, achieving 97% accuracy in client UAT
- Led the platform's security hardening and production readiness effort, taking it live for Astellas
- Coordinated across backend, frontend, and DevOps teams to manage deployment through UAT to production

GERM Bot, Healthcademia (Multilingual Clinical AI Assistant)

- Built cross-language (EN/ES) retrieval capability into the AI assistant's vectorstore architecture
- Improved citation reliability across the platform, ensuring accurate and persistent source referencing
- Delivered a full frontend redesign, including rebranding and UI/UX updates, per client requirements

WeightlessAI (AI Health Coaching Assistant)

- Built the end-to-end retrieval-augmented generation pipeline from scratch, from document ingestion through response generation
- Designed distinct, personalized patient and clinician chat experiences with dedicated safety guardrails
- Ensured platform stability and security through infrastructure hardening, rate limiting, and access control, while maintaining codebase quality across sprint cycles

Miniso UK IT Support Bot (POC, solo build, awarded to Ten Pearls)

- Built a voice AI helpdesk enabling employees to call in and resolve L1 IT support issues, with automatic Jira escalation
- Designed the real-time voice AI architecture, handling concurrent audio streams and conversational flow end to end
- Demoed the proof of concept directly to the client, securing the full project award for Ten Pearls

1LINK Private Limited

Management Trainee Officer – Product Management | 03/2025 – 10/2025

- Directed design and feature use cases for a new payment app, producing BRDs, FSDs, SOPs, and UI flows; collaborated with cross-functional stakeholders and vendors to ensure smooth delivery, while leading SIT and UAT to validate usability and performance.
- Contributed to 1GO with State Bank of Pakistan's RAAST P2M service, enabling QR payments and Request-to-Pay functionality; applied data-driven insights to streamline transactions and enhance digital financial infrastructure.

Management Trainee Officer – Project Management | 02/2024 – 03/2025

- Managed 45+ external projects certifying banks, government, and financial institutions on 1LINK services and integrations with Visa, MasterCard, and UnionPay; also led internal initiatives including SDRP lifecycle updates, SDRS revamp, and deployment of AI-driven fraud management systems.
- Developed project plans, coordinated cross-functional teams, and served as a bridge between IT and business units; led weekly scrums, leveraging Agile practices to deliver scalable, data-driven solutions.

APPRENTICESHIP EXPERIENCE & EXTRACURRICULAR ACTIVITIES

- Selected as part of the Ten Pearls team for the Google AI Fellowship, an initiative arranged by Google and SAP.
- Google Project Management Professional Certificate, issued by Google.
- Software Development Intern, EFU General Insurance Ltd.: Implemented the "Surveyor System Module" using Oracle APEX. Contributed to data engineering tasks (ETL & Analysis) and developed Get/Post-based REST APIs.
- CFO, IBA HR Club (2022-2023): Organized a study tour to the Pakistan Stock Exchange (PSX) and a guest speaker session with HR professionals, offering valuable industry insights to students.

ACADEMIC QUALIFICATIONS

- 2023-2026 Master's, Institute of Business Administration, CGPA 3.59 (Dean's List)
- 2019-2023 Bachelor's, Institute of Business Administration, CGPA 3.63 (Dean's List)
- 2017-2019 A Level's, Nixor College, 3 A*'s, 1 A (Teaching Assistant, on Scholarship)
- 2015-2017 O Level's, Foundation Public School, 6 A*'s, 4 A's

OTHER PROJECTS OVERVIEW

- Developed Machine Learning, Deep Learning, and Computer Vision projects, including 3D Bounding Box Estimation, neural networks, error correction algorithms, efficient search, autoencoders, and CNNs, using Python programming, SQL, and AI-related tools for model training, evaluation, and optimization.
- Developed Blood Connect as a final year project, a full stack React Native Android mobile app with AI intelligent chat and an AI based donor receiver matching mechanism.
- Built AR Marketing Hub, a full stack React and Node application with AI chat integrated.
- Created additional projects including E-Doctor, STAM Virtual Mart, and Teacher Resource Tool using diverse tech stacks to solve practical challenges.
- Created interactive Power BI dashboards for advanced data analysis and hosted solutions on Azure Cloud; designed applications with Microsoft Power Apps and implemented Microsoft 365 security measures, including ATP policies.

SKILLS & TOOLS

- AI/LLM Engineering: LangChain, RAG pipelines, OpenAI (GPT-4o, Realtime API, Whisper), AWS Bedrock (Claude, Cohere embed/rerank), Voice AI, AI Automation, agentic workflows, prompt engineering
- Full-Stack Development: React, TypeScript, Vite, Node.js, Express.js, FastAPI, Flask, Prisma, SQLAlchemy (async)
- Data & Databases: PostgreSQL, SQLite, Pinecone, pgvector, Pandas, NumPy
- Programming & ML Frameworks: Python, SQL, TensorFlow, PyTorch, Keras, Scikit-learn, XGBoost
- Data & Analytics Tools: Power BI, Tableau, Matplotlib
- Cloud, DevOps & Integrations: AWS (ECS, ECR, Bedrock, boto3), Azure AI, Docker, GitHub Actions, Jenkins, Twilio Voice, Jira REST API
- Computer Vision: OpenCV, YOLO
